

## System requirements Version 2012

The SOFiSTiK products in Version 2012 have been developed, tested and released for Windows XP Professional (SP3), and Windows Vista Business 32-Bit and Windows 7 Professional 32 & 64-Bit.

Similarly, the products based on the AutoCAD platform have been developed, tested and released on the current German and English versions of AutoCAD. For the SOFiCAD and SOFiPLUS 2012 version 18.2, this corresponds to AutoCAD 2012.

Only SOFiSTiK products that have been installed on this Operating Systems and AutoCAD platforms will be supported.

Installation and use of SOFiSTiK products might be possible on other Windows operating systems such as Windows 2000 or Vista-Home and Windows 7 Home Premium, but we do not perform QA for that.

In almost the same manner SOFiSTiK Autodesk based products might run on vertical Autodesk products such as AutoCAD Architecture. As well we have no QA for these possible constellations.

However, our helpdesk will try to assist you and to answer your questions.
